Background

Community Development & Advocacy Forum Nepal (CDAFN) is a non-profit making and non-governmental organization. It was established in 2006 in Mahottari district in Nepal. The organization was formed and operated by a group of professional of Natural resource and social management professional. The democratic government of Nepal which provide a space to the various professionals, who are highly dedicated for the management and development about different types of natural and social evils and problems. This group decided to work in an organized way to uplift social, economic, political and social health conditions of local community especially of marginalized groups and women.

Target Group

Women, Dalits, Janjati, Madheshi, Youth and Children including poor, disadvantaged and disable group of society are the target group of the institution.

Vision

The natural resources in the Chure, Bhabar and Terai are developed and managed in a regionally coordinated manner for the wellbeing of the people and considering the sustainability of the ecosystem services.

Mission

CDAFN aims to help on proper utilization of natural resources for the reduction of poverty and disaster through the development and use of technology, by demonstrating results, sharing knowledge and influencing others.

Goal

The main goal of the organization is to contribute to the livelihood and well-being of the people through sustainable natural resource management, disaster risk reduction and climate change adaptation of the Chure, Bhabar and Terai region of Nepal.

Objectives

- Manage community resources in collaborative manner by empowering community groups and their stakeholder.
- Conduct the programs of Disaster Risk Reduction such as earthquake, landslide, flood etc.
- To strike to practice for good governance system and raise our voice to establish the good governance in community level.
- To conduct the programs of natural disaster relief and mitigation such as earth quick, landslide, floods etc. as per need in target groups.
- Aware the local community on the natural resources and environmental protection and conduct all the development activities in the way of environment friendly.
- Conduct the programs on target groups to enhance the NTFP, aromatic plants, private forestry etc. for the management of natural resources as per need of local community and potentiality of region.
- Design an appropriate income generation activities and implement in the target groups as per need and potentiality of region.
- Organize different types of community activities with coordination and support of other related organizations.
- To aware the community and make their involvement in different types of IGA activities and raise poverty reduction practice in community.

- To provide safe drinking water facilities in rural and urban area and make the community empower to manage the drinking water system themselves in future.
- Organize dalits, men and women against untouchability and gender discriminations/violence. Develop leadership so that they have a share in the local resources and participation in the decision making process in the local governance.
- We seek opportunities to work in partnership with other agencies (government and non-government) in the detection of these aims and objectives.

Major Areas of Activity:

- Advocacy and services for protection and promotion of human rights,
- Good governance, gender equity and equitable development
- Peace, justice and reconciliation
- Education
- Women empowerment
- Income generation
- Natural Resource Management
- Disaster Risk Reduction promotion
- Agriculture and livelihood (food security)
- Climate Change adaptation / Mitigation
